Financial Accounting (FA)

Without good accounting you can't properly tell what your company looks like, know your cash situation, or provide proper financials.

- Accounting setup & integration
- Infrastructure: systems and processes
- Growth, scaling, and controls
- Financial reporting – IFRS, GAAP

Financial Planning & Analysis (FP&A)

To develop your venture, you need to determine how your company will afford to achieve its vision, strategic goals and objectives.

- Financial strategy, viability and growth
- Forecasting and budgeting
- Life cycle: valuation and fund-raising (M&A)
- Due-diligence: research & evaluation

Managerial Accounting (MA)

Companies need to connect the finance function to the business opportunity and other functional areas such as sales, marketing, product development, and HR.

- Business economics: unit economics
- Framework & benchmarking
- Performance accounting: metrics (KPIs)
- Cash-flow and cash management
